Epic

Container

Container

Group of requirements that are functionally related and should be implemented together in a short period of time.

01 One or more are epic counterparts

02 Can be initially empty

03 Can be dynamic in composition

04 Should be implemented in one or a few iterations

05 Are not sprint goals in general

06 Elements of a roadmap, not a specification

○ In Practice: Elicit Requirements

Meeting Notes

Data Update

Library members should be able to update their personal data.

Reporting

The library administration wants to generate reports on the use of the library so that it can identify trends and adjust its services accordingly.

Following ideas:

1. ...
2. ...
3. ...

In Practice: Analyze Requirements
